

OrthoFeet®

ACCOMMODATIVE DESIGN

- ✓ **Protective inners** and **Stretchable uppers** to reduce skin friction.
- ✓ **Wider toe-box** to accommodate wider feet, swelling, bunions etc.
- ✓ **Extra depth shoe** with removable spacers that allow comfort fit of thick insoles & provide room for claw/hammer toes etc.

PRESSURE DISTRIBUTION

- ✓ **Orthotic Insoles with arch support** reduce over-pronation & ensure even pressure along the arches.
- ✓ **Curved Forefoot design** reduces excess pressure on forefoot.

SHOCK ABSORPTION

- ✓ **Cushioned** Orthotic insoles made with EVA to provide good impact resistance.
- ✓ **Gel padding** under heel prevents excess pressure at heel.
- ✓ **Air Pockets** under heel provide excellent shock absorption.

OrthoFeet® is the #1 shoe recommended by Podiatrists for :

**Diabetes | Arthritis | Heel Pain | Plantar Fasciitis | Back Pain | Bunions | Foot Pain
Hammer Toes | Knee & Hip Pain | Overpronation | Flat Feet | Achilles Tendon Pain**
